Disc Duplicators & Printers

from Primera – the leading manufacturer

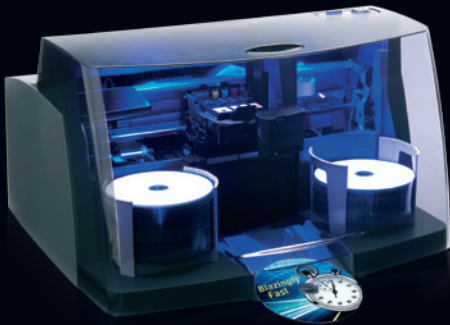

Disc Publishers

For small production runs Primera's Disc Publisher SE (DP-SE) is an excellent choice. It is affordable enough for virtually any business. DP-SE produces gorgeous, full-colour discs in jobs of up to 20 discs at a time. It's the perfect, low-cost automated printing and publishing solution.

The world's smallest disc publisher uses only one multi-colour (CMY) cartridge with process black (K) and is therefore perfect for applications that require a lot of different multi-colour disc layouts. That way the ink is used evenly. If single unique copies (disc on demand) or small quantities of professional-quality discs are needed, we suggest the Disc Publisher SE.

Primera's DP-4100 Series has extremely fast print speeds. In just six seconds a full-colour disc with 100% coverage is printed – that's up to 20 times faster than competitors for similar print quality.

DP-4100 Series is Primera's first publisher line to offer separate ink cartridges for each colour (Cyan, Magenta, Yellow, Black); saving money on every printed disc, but especially on disc designs that use more of one colour than another. The built-in semi-permanent print head is easily replaceable for a fraction of the cost usually seen in the industry.

Disc picking and transport robotics have both been optimized for speed. A rock-solid and reliable new belt drive system is utilized to deliver three times faster robotics than previous models and also gives you smoother and quieter operation.

DP-4100 Series is available as 50- or 100-disc version with either one or two recording drives. The DP-4100 publishers are perfect to produce quantities of hundreds of full-colour discs day by day.

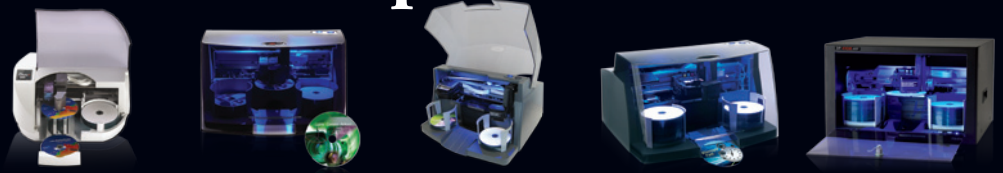

The DP-4102 XRP is Primera's industrial-grade model that includes all of the features of DP-4100 Series, but comes in a 19" rack compatible steel cabinet with locking front door, so that it can be stacked to save space and allow easy integration.

DP-4102 XRP is intended for customers in mission-critical applications such as law enforcement, medical imaging and others who need the highest reliability in their disc burning and printing.

All Disc Publishers can be easily integrated in own applications by using Primera's free Software Developer's Kit (SDK) for both Windows and Mac.
